Education

2016

CALIFORNIA STATE UNIVERSITY, NORTHRIDGE

B.S. in Computer Science

Work Experience

2023–PRESENT

LA COUNTY PUBLIC WORKS – APPLICATION DEVELOPER I

- *In-house Applications*:
  - **SWIMS** (Solid Waste Information Management System) - Converted deprecated reports into web reports using ASP.NET/C#. During review we we also corrected discrepancies from the original report fixing queries using PLSQL. Additionally, functionality was added to make these updated reports more robust and user friendly. Deployed security vulnerability fixes to address items such as SQL injection & XSS (Cross-site scripting). Updated various pages to be WCAG 2.0 compliant.
  - **HAV** (Home Assigned Vehicles) - Worked on the initial user interface concept that was used in the redesign of the application using C# and Bootstrap. Met and with customer to get feedback and make adjustments as needed.
- *Commercial off-the-shelf Software*:
  - **Ivanti - Cherwell**
    - Provide primary Tier 1 support for the Cherwell platform, addressing and resolving a wide range of end-user issues, including access problems, ticket escalations, and form-related inquiries.
  - **Advanced Utility Systems - CIS**
    - Day to day maintenance of servers as well as customer support both during and after business hours.

2020–2023

PROGRAMMER ANALYST IV – LOGIX FEDERAL CREDIT UNION

- Developed & maintained programs utilizing the Symitar Episys PowerOn language.
- Trained new team members & worked on reusable training guide.
- Created internal applications using C#, Java, Python, HTML, CSS & JavaScript, & web automation using Selenium.
- Helped team transition into Microsoft Teams & integrated OneNote to create better documentation for interdepartmental use.

2018–2020
